

How Can a City Use Biodiesel?

Farmers can be self-sufficient by using biodiesel to power their tractors.

Disneyland powers one of their trains with biodiesel.

Biodiesel can power generators for homes.

Diesel cars and trucks use biodiesel as a drop-in fuel.

School buses often use biodiesel to cut down on exhaust.

Boats can benefit from biodiesel, which is significantly less harmful to marine life.

Heavy equipment can be supplied with and benefit from biodiesel.

Buildings can use biodiesel as an energy source for heat.

Biodiesel can power heavy-duty fleets.
